Web Screapping using BeautifulSoup

7) Write a python program to scrape mentioned news details from https://www.cnbc.com/world/?region=world : i) Headline ii) Time iii) News Link

In [1]:

```
from bs4 import BeautifulSoup
import requests
import re
```

In [2]:

```
url=requests.get("https://www.cnbc.com/world/?region=world")
url
```

Out[2]:

```
<Response [200]>
```

In [3]:

```
soup=BeautifulSoup(url.text,'html.parser')
soup
```

Out[3]:

```

The journal reports results achieved in addition to proposals for new ways of looking at AI problems, both of which must include demonstrations of value and effectiveness. \u003c/p\u003e\u003cp\u003e Papers describing applications of AI are also welcome, but the focus should be on how new and novel AI methods advance performance in application areas, rather than a presentation of yet another application of conventional AI methods. Papers on applications should describe a principled solution, emphasize its novelty, and present an indepth evaluation of the AI techniques being exploited.\u003c/p\u003e\u003cp\u003e Apart from regular papers, the journal also accepts Research Notes, Research Field Reviews, Position Papers, and Book Reviews (see details below). The journal will also consider summary papers that describe challenges and competitions from various areas of AI. Such papers should motivate and describe the competition design as well as report and interpret competition results, with an emphasis on insights that are of value beyond the competition (series) itself. \u003c/p\u003e\u003cp\u003e From time to time, there are special issues devoted to a particular topic. Such special issues must always have open calls-for-papers. Guidance on the submission of proposals for special issues, as well as other material for authors and reviewers can be found at \u003ca href=http://aij.ijcai.org/special-issues rel=external target=_blank\u003ehttp://aij.ijcai.org/special-issues\u003c/a\u003e. \u003c/p\u003e\u003cp\u003e \u003cb\u003eTypes of Papers \u003c/b\u003e\u003c/p\u003e\u003cp\u003e\u003cb\u003e Regular Papers \u003c/b\u003e\u003c/p\u003e\u003cp\u003e AIJ welcomes basic and applied papers describing mature, complete, and novel research that articulate methods for, and provide insight into artificial intelligence and the production of artificial intelligent systems. The question of whether a paper is mature, complete and novel is ultimately determined by reviewers and editors on a case-bycase basis. Generally, a paper should include a convincing motivational discussion, articulate the relevance of the research to Artificial Intelligence, clarify what is new and different, anticipate the scientific impact of the work, include all relevant proofs and/or experimental data, and provide a thorough discussion of connections with the existing literature. A prerequisite for the novelty of a paper is that the results it describes have not been previously published by other authors and have not been previously published by the same authors in any archival journal. In particular, a previous conference publication by the same authors does not disqualify a submission on the grounds of novelty. However, it is rarely the case that conference papers satisfy the completeness criterion without further elaboration. Indeed, even prize-winning papers from major conferences often undergo major revision following referee comments, before being accepted to AIJ. \u003c/p\u003e\u003cp\u003e \u003ci\u003eAIJ\u003c/i\u003e caters to a broad readership. Papers that are heavily mathematical in content are welcome but should include a less technical high-level motivation and introduction that is accessible to a wide audience and explanatory commentary throughout the paper. Papers that are only purely mathematical in nature, without demonstrated applicability to artificial intelligence problems may be returned. A discussion of the work's implications on the production of artificial intelligent systems is normally expected. \u003c/p\u003e\u003cp\u003e There is no restriction on the length of submitted manuscripts. However, authors should note that publication of lengthy papers, typically greater than forty pages, is often significantly delayed, as the length of the paper acts as a disincentive to the reviewer to undertake the review process. Unedited theses are acceptable only in exceptional circumstances. Editing a thesis into a journal article is the author's responsibility, not the reviewers'. \u003c/p\u003e\u003cp\u003e \u003cb\u003eResearch Notes \u003c/b\u003e\u003c/p\u003e\u003cp\u003e The Research Notes section of the Journal of Artificial Intelligence will provide a forum for short communications that cannot fit within the other paper categories. The maximum length should not exceed 4500 words (typically a paper with 5 to 14 pages). Some examples of suitable Research Notes include, but are not limited to the following: crisp and highly focused technical research aimed at other specialists; a detailed exposition of a relevant theorem or an experimental result; an erratum note that addresses and revises earlier results appearing in the journal; an extension or addendum to an earlier published paper that presents additional experimental or theoretical results. \u003c/p\u003e\u003cp\u003e \u003cb\u003eReviews\u003c/b\u003e \u003c/p\u003e\u003cp\u003e The AIJ invests significant effort in assessing and publishing scholarly papers that provide broad and principled reviews of important existing and emerging research areas, reviews of topical and timely books related to AI, and substantial, but perhaps controversial position papers (so-called \"Turing Tape\" papers) that articulate scientific or social issues of interest in the AI research community. \u003c/p\u003e\u003cp\u003e \u003cb\u003eResearch Field Reviews:\u003c/b\u003e AIJ expects broad coverage of an established or emerging research area, and the articulation of a comprehensive framework that demonstrates the role of existing results, and synthesizes a position on the potential value and possible new research directions. A list of papers in an area, coupled with a summary of their contributions is not sufficient. Overall, a field review article must provide a scholarly overview that facilitates deeper understanding of a research area. The selection of work covered in a field article should be based on clearly stated, rational criteria that are acceptable to the respective research community within AI; it must be free from personal or idiosyncratic bias. \u003c/p\u003e\u003cp\u003e Research Field Reviews are by invitation only, where authors can then submit a 2-page proposal of a Research Field Review for confirmation by the special editors. The 2-page proposal should include a convincing motivational discussion, articulate the relevance of the research to artificial intelligence, clarify what is new and different from other surveys available in the literature, anticipate the scientific impact of the proposed work, and provide evidence that authors are authoritative researchers in the area of the proposed Research Field Review. Upon confirmation of the 2-page proposal, the full Invited Research Field Reviews can then be submitted and then undergoes the same review process as regular papers. \u003c/p\u003e\u003cp\u003e \u003cb\u003eBook Reviews: \u003c/b\u003eWe seek reviewers for books received, and suggestions for books to be reviewed. In the case of the former, the review editors solicit reviews from researchers assessed to be expert in the field of the book. In the case of the latter, the review editors can either assess the relevance of a particular suggestion, or even arrange for the refereeing of a submitted draft review. \u003c/p\u003e\u003cp\u003e \u003cb\u003ePosition Papers\u003c/b\u003e: The last review category, named in honour of Alan Turing as a \"Turing Tapes\" section of AIJ, seeks clearly written and scholarly papers on potentially controversial topics, whose authors present professional and mature positions on all variety of methodological, scientific, and social aspects of AI. Turing Tape papers typically provide more personal perspectives on important issues, with the intent to catalyze scholarly discussion. \u003c/p\u003e\u003cp\u003e Turing Tape papers are by invitation only, where authors can then submit a 2-page proposal of a Turing Tape paper for confirmation by the special editors. The 2-page proposal should include a convincing motivational discussion, articulate the relevance to artificial intelligence, clarify the originality of the position, and provide evidence that authors are authoritative researchers in the area on which they are expressing the position. Upon confirmation of the 2-page proposal, the full Turing Tape paper can then be submitted and then undergoes the same review process as regular papers. \u003c/p\u003e\u003cp\u003e \u003cb\u003eCompetition Papers \u003c/b\u003e\u003c/p\u003e\u003cp\u003eCompetitions between AI systems are

now well established (e.g. in speech and language, planning, auctions, games, to name a few). The scientific cont
ributions associated with the systems entered in these competitions are routinely submitted as research papers to
conferences and journals. However, it has been more difficult to find suitable venues for papers summarizing the
objectives, results, and major innovations of a competition. For this purpose, AIJ has established the category o
f competition summary papers. \u003c/p\u003e\u003cp\u003e Competition Paper submissions should describe the compe
tition, its criteria, why it is interesting to the AI research community, the results (including how they compare
to previous rounds, if appropriate), in addition to giving a summary of the main technical contributions to the f
ield manifested in systems participating in the competition. Papers may be supplemented by online appendices givi
ng details of participants, problem statements, test scores, and even competition-related software. \u003c/p\u003
e\u003cp\u003e Although Competition Papers serve as an archival record of a competition, it is critical that they
make clear why the competition's problems are relevant to continued progress in the area, what progress has been
made since the previous competition, if applicable, and what were the most significant technical advances reflect
ed in the competition results. The exposition should be accessible to a broad AI audience.\u003c/p\u003e","descri

```
Reward is enough
Making sense of raw input
Law and logic: A review from an argumentation perspective
Creativity and artificial intelligence
Artificial cognition for social human–robot interaction: An implementation
Explanation in artificial intelligence: Insights from the social sciences
Making sense of sensory input
Conflict-based search for optimal multi-agent pathfinding
Between MDPs and semi-MDPs: A framework for temporal abstraction in reinforcement learning
The Hanabi challenge: A new frontier for AI research
Evaluating XAI: A comparison of rule-based and example-based explanations
Argumentation in artificial intelligence
Algorithms for computing strategies in two-player simultaneous move games
Multiple object tracking: A literature review
Selection of relevant features and examples in machine learning
A survey of inverse reinforcement learning: Challenges, methods and progress
Explaining individual predictions when features are dependent: More accurate approximations to Shapley values
A review of possible effects of cognitive biases on interpretation of rule-based machine learning models
Integrating social power into the decision-making of cognitive agents
“That's (not) the output I expected!” On the role of end user expectations in creating explanations of AI systems
Explaining black-box classifiers using post-hoc explanations-by-example: The effect of explanations and error-rates in XAI user studies
Algorithm runtime prediction: Methods & evaluation
Wrappers for feature subset selection
Commonsense visual sensemaking for autonomous driving — On generalised neurosymbolic online abduction integrating vision and semantics
Quantum computation, quantum theory and AI
```
